

ELECTROSAFE

You're looking for matting that is tested and proven to recognised standards, that has high dielectric strength, and is designed to save lives? For people working at switch boards, generator sets, fuse boxes, control panels and other high voltage equipment on land and sea, e.g. marine, port operations, mining, railways.

Electrosafe is a black vinyl matting that conforms to ANSI/ASTM D178-01 specifications. It has a dielectric strength of 30,000 volts with a recommended usage of up to 17,000 volts. Electrosafe has an inflammability rating of "A" per MVSS302 and is highly resistant to wear. Electrosafe is available in 900mm wide rolls or cut to length to your requirements. The overall thickness is 6mm.

FEATURES

- Very high dielectric strength
- Conforms to ANSI/ASTM D178-01
- Insulates up to 17,000 volts
- Tested and proven to recognised standards
- Approx. 7mm thick

CODE	SIZE (mm)
Electrosafe Black	
IM900W	900 wide, cut per metre
IM900R	900 x 22.86m roll
